

# ODIN Care™

Senior Living Communities

## ABOUT ODIN CARE™

Senior Living communities are facing a huge challenge. They need to balance resident safety and care against the growing constraints of reimbursement rates, increasing pressure from staffing shortages, and labor costs.

The ODIN Care™ system by Advanced Wireless Communications is a wireless based platform that delivers solutions to your challenges. Such as a variety of communication solutions, advanced integration capabilities, and real-time reporting. These will:

- Improve resident care and safety
- Increase staff productivity
- Reduce excess labor costs (OT)
- Reduce the daily chaos associated with limited communication and reporting
- Improve staff satisfaction/retention by eliminating redundant tasks and balancing workload among them
- Empower decision making with real information

ODIN Care delivers dependable technology that can be paired with two-way radios, smart phones, and other devices so you can respond quickly to residents while keeping staff connected. It can stand alone or be integrated into existing call systems, thus eliminating the high cost of completely replacing your current solution. In addition, integrate with environmental, fire detection, and access control systems to provide a single, easy to use, communication platform.

Powerful dashboards, which can be accessed from any web browser, show daily activity, alarms, and system performance as it happens. Reporting can be custom tailored to each users' preferences with automation that allow reports to be generated and sent to your inbox, making it even easier to stay updated on what is happening at your facility.

### ODIN DASHBOARD

Allows you to access active alarms and maintenance requests, do simple transmitter swaps, and easily generate reports.

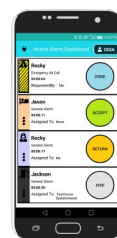

- Faster response times
- Increase productivity
- Important information is accessible real time, from anywhere with an Internet connection
- Improve safety and security
- Improve training focusing on key metrics
- Document compliance

### ODIN REPORTING

- Reports can be automatically delivered to various stakeholders
- Easily enable viewing by location, building, and station
- Shows response times to resident calls, for state visits and overall resident satisfaction
- Can help optimize staffing by providing useful time of day activity

### ODIN CONNECT

Allows existing legacy call light systems to integrate with ODIN Care. With ODIN Connect you will get real-time reporting, automated voice communication over smart devices and two-way radios, and when budget permits you can convert legacy lights, one room at a time, to wireless resident call solutions.

### ODIN MOBILE APP

Take the ODIN Dashboard with you! Featuring:

- Activity Alerts
- Accept Alert
- Return Alert to Queue
- Close Alert
- Disposition Tracking

## RESIDENT BENEFITS

### IMPROVED RESPONSE TIMES

Instant notifications for alarms and assistance needed calls reduce resident wait times.

### BETTER QUALITY OF CARE

Your team can quickly communicate with each other to respond to calls or request additional assistance, ensuring residents receive care when it's needed the most.

### SAFETY AND SECURITY

Establishing a safe and secure environment allows residents to remain safe while respecting their privacy and need for independence.

### INCREASED PEACE OF MIND

Residents and their families know that a caring staff member is just a call away.

### ENHANCED QUALITY OF LIFE

Create a quieter and more home-like environment for residents by reducing/eliminating loud audible announcements and alarms that could cause distress for the residents. Instead alerts and notifications go directly to staff over output devices.

## BUSINESS BENEFITS

### SINGLE SOURCE SOLUTION

ODIN Care™ offers all of the tools you need to manage communication in your facility, including a comprehensive maintenance program and 24-7 support.

### INCREASED COMMUNICATION

Staff can contact each other with the push of a button and the corporate office can easily contact the local facility when needed.

### FLEXIBILITY FOR THE FUTURE

The system's modular design allows for easy expansion and customization as your needs change.

### SIMPLE USER INTERFACE

Our system is easy to use, which reduces staff frustration and turnover rates.

### BETTER ANALYTICS

The user interface offers access to call data and trends to assist you in communicating with residents' families and improving response times and overall service to residents.

### SEAMLESS INTEGRATION

Odin Care™ integrates with other systems already in use at your facility, such as wander control, EAS systems, intercom systems, building management, and electronic records.

### BETTER OVERSIGHT

A local web-based user interface provides features for monitoring active alarms on a dashboard, broadcasting text-to-speech messages over radio, reviewing response time reports, and modifying system configuration.

## ABOUT AWC

Advanced Wireless Communications understands the unique needs of skilled, memory care, assisted, and independent living facilities when it comes to resident care. We offer a powerful line-up that will improve response times, productivity, safety and security, and quality of service and care for residents.

## CUSTOMERS

## OUR PARTNERS

“

The radios have saved 10,000 steps, improved safety for the residents and staff, quieted the environment, and increased communication between staff tenfold.

-Mike Ward, Administrator of Estelline Nursing and Care Center
