Quick Start Guide
Waterproof Pendant Activation & Clearing

To Send an Alarm
Simply press the gray activation button and hold it for at least one second.

The Pendant Will Vibrate
And you will see a series of red flashing lights that will blink rapidly at first and then will slow to a rate of once every three seconds until the alarm is cleared.

Please Note

After Sending an Alarm
The end user can send a subsequent alarm once ten seconds has elapsed, even if the initial alarm has not been cleared on the device.
