

OTTO®

NoizeBarrier® Range SA Tactical Over-The-Ear Headset

State-Of-The-Art Situational-Awareness

**360° Situational
Awareness**

**Blast & Impulse
Noise Protection**

**Amplification of
Soft Sounds**

**72 Hour
Talk Time**

The NoizeBarrier® Range SA was originally designed for military use and is the premier headset for true firearm professionals who need advanced hearing protection but without radio communication capability.

Whether you are at an outdoor / indoor range or a tactical shoot house, the NoizeBarrier® Range SA features 360° advanced situational awareness and industry-leading hearing protection for any live-fire training activity.

OTTO has collaborated with tactical operators to design and engineer a headset that meets the demands of today's modern firearms user. The results are 360° advanced situational awareness and industry-leading hearing protection. The crystal-clear audio and precise situational awareness, deliver an unparalleled soundscape experience for maximum safety and performance.

Sophisticated technology automatically dampens loud or impulse sounds without clipping or cutting out, while situational awareness microphones amplify normal-level sounds and nearby conversation.

Features

- Microphones built into each ear cup amplify barely audible low sounds, allowing users to hear the “important noises” and provide accurate sound localization letting users stay alert and responsive to the surrounding environment.
- Easy-access controls mounted on the left ear cup adjust volume to five different levels.
- Ultra-soft, comfortable Comply™ foam ear cushions form a tight seal around the ears to significantly reduce the effects of unsafe noise levels. Snap off to easily replace in the field when needed.
- Can be configured to receive radio transmissions from speaker mics and surveillance kits to maintain discreet communication in a tactical environment.
- Available in Black, Flat Dark Earth and Olive Drab Green.

The **NoizeBarrier® Range SA**

combines performance with extreme comfort. This shape of the ear seals was specifically designed with the best ergonomic principles in mind, allowing the headset to be worn all day without discomfort. The design allows for a smooth shouldering of your firearm and the headset fits well with safety glasses and other equipment.

Specifications

- Talk time of 72 hours with 2 AAA batteries. Clarity of situational awareness does not degrade over entire life of batteries.
- Noise Reduction Rating (NRR): 23dB
- Compliant to MIL-STD-810G specifications
- Automatic shutdown after 2 hours of idle time
- Optimal operation and storage temperature range: -40° C to +71° C
- USA Country of Origin. TAA, BAA, MIL-STD-810G, and Berry Amendment compliant
- Meets IP68 standard to withstand full immersion to 1 meter for 31 minutes
- 1-year warranty

Designed, Manufactured and Engineered in the U.S.A. for Over 50 Years.
